

AIRBALTIC

SHEET-METAL TECHNICIAN, AVIATION (APPRENTICE)

careers.airbaltic.com

on-the-job learning by assisting experienced Air Baltic staff in aircraft structure sheet-metal repairs, whilst gaining the practical experience to become in future a certified Sheet-Metal Technician

We will entrust you to

- Evaluate extent of the aircraft structure damage and complete reports;
- Determine appropriate aircraft manufacturer approved repair scheme and prepare repair schedule;
- Prepare aircraft structure for the repair (damaged area cut-out, fasteners drill-out, sanding, etc);
- Carry on aircraft structure repairs (sheet-metal material cutting, rolling, bending, drilling, riveting, etc.) using sheet-metal tools (guillotine shears, rolling machines, folding machines, drilling machines, hand tools, etc.).

What You will need to succeed

- Experience with sheet - metal working will be considered as an advantage
- Good knowledge of English, Latvian and Russian languages
- Completed secondary education
- Interest in metal working
- Ability to work at least 3 full days per week (from 08:00 - 20:00).

*Paid apprenticeship (0-3 months = 440 EUR/gross, 4-12 months = 750 EUR/gross, 12 + months = 900 EUR/gross)
